ELSEVIER

Int. J. Production Economics 54 (1998) 337–338

international journal of
production
economics

Contents Volume 54

Vol. 54, No. 1

Waiting line model applications in manufacturing
S. Subba Rao, A. Gunasekaran, S.K. Goyal and T. Martikainen 1
Determination of optimal production rates on a single facility with dependent mold lifespan
D.H. Moon and D.P. Christy 29
A compilation of inflation and location indexes
D.S. Remer, L. Huynh, K. Agarwal, B.J. Auchard and T. Heaps-Nelson 41
An economic design of variable sampling interval $\bar{X}$ control charts
D.S. Bai and K.T. Lee 57
Genetic algorithm approach to earliness and tradiness production scheduling and planning problem
Y. Li, W.H. Ip and D.W. Wang 65
Optimal pricing for a target profit: Case study on a veterinary diagnostic laboratory
W. Kuo and G. Jain 77
Effects of variability on the due-time performance of a continuous materials flow production system in series
B. Tan 87
JIT purchasing vs. EQQ with a price discount: An analytical comparison of inventory costs
F. Fazel, K.P. Fischer and E.W. Gilbert 101
Diary of Events 111

Vol. 54, No. 2

A concurrent engineering decision model: Management of the project activities information flows
S. Nicoletti and F. Nicolò 115
Using DEA to evaluate 29 Canadian textile companies – Considering returns to scale
P. Chandra, W.W. Cooper, S. Li and A. Rahman 129
Manufacturing planning and control practices and their internal correlates: A study of firms in Ghana
K. Amoako-Gyampah and S.S. Boye 143
Computer supported changes in project management
S. Karvonen 163
Effects of discounting and demand rate variability on the EOQ
W.K. Klein Haneveld and R.H. Teunter 173
Investments in modern production technology and the cash flow-oriented EPQ-model
C. Hofmann 193
A note on the survey of project evaluation techniques in major corporations
E. Segelod 207
Maximising the 'benefits per dollar' to customers: A new organisational focus
D. Samson and J. Wacker 215
Diary of Events 231

Vol. 54, No. 3

High performance heuristic algorithm for controlling stochastic network projects
D. Golenko-Ginzburg and A. Gonik 235

0925-5273/98/$19.00 Copyright © 1998 Elsevier Science B.V. All rights reserved

Minimizing total weighted completion time at a pre-assembly stage composed of two feeding machines
C.S. Sung and S.H. Yoon 247
Simulation study of CONWIP for a cold rolling plant
M. Huang, D. Wang and W.H. Ip 257
Inventory investment, product cycles, and the imperfectly competitive firm
P.C. Jones, L.N. Moses and J.L. Zydiak 267
On the applicability of activity based costing as a planning instrument
C. Schneeweiss 277
Predictive maintenance: The one-unit replacement model
C. Chu, J.-M. Proth and P. Wolff 285
An approximate method for calculating the mean sojourn time of *K*-station production lines with no intermediate buffers
H.T. Papadopoulos 297
Computer-aided economic optimization of end-milling operations
J. Wang 307
A genetic algorithm-based planning system for PCB component placement
L.P. Khoo and T.K. Ng 321
Diary of Events 333
